TAK Server Connection Quick Guide
BAB/DC Aircraft Recovery Operations
247 Group [247grp.net](247grp.net)

ATAK Instructions

1. Using your phone's camera, scan the QR code below to download the connection zip file.

2. Open the ATAK app and go to **Menu → Imports → Local SD → Downloads** and select the zip file you downloaded, called 'Android-Emergency-Response.zip'.

3. Once you see the green dot at the top/right of your screen, you are connected to the TAK Server.

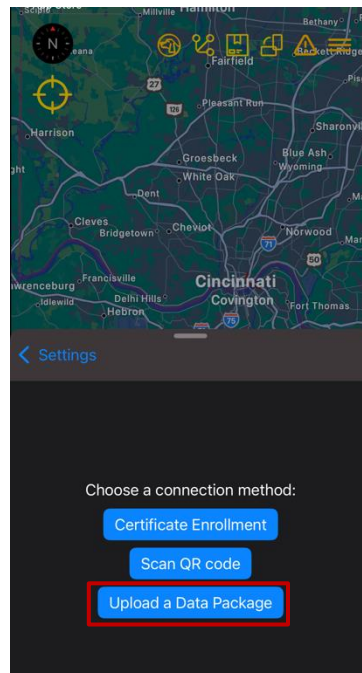

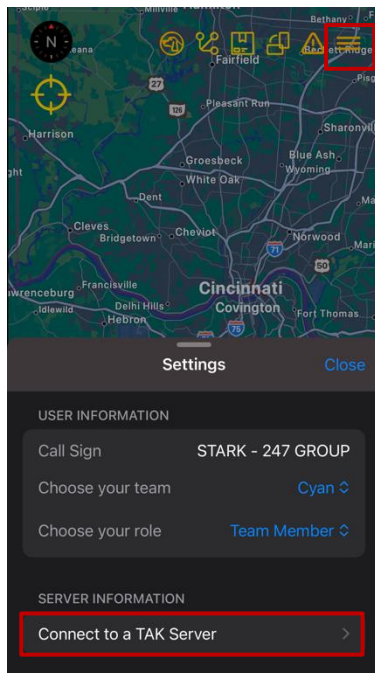

4. To set your callsign and team, go to **Menu → Settings → Callsign and Device Preferences.**
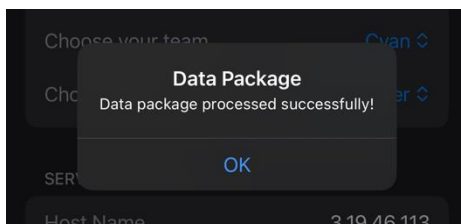

TAK Aware Instructions

1. Using your phone's camera, scan the QR code below to download the connection zip file.

2. Open TAK Aware and go to **Settings → Connect to a TAK Server**. Tap 'Upload a Data Package' and select the connection .zip file you just downloaded, called 'IOS- Emergency-Response.zip.'

3. Once you see the *'Data package processed successfully'* message, you are connected to the TAK Server.

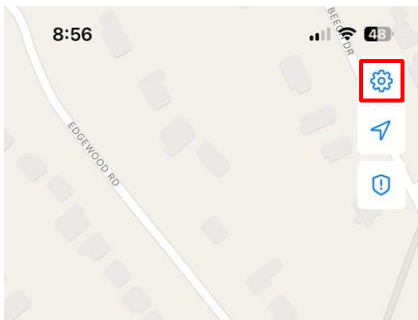

4. To set your callsign, go to Settings → Callsign.

iTAK Instructions

4. Using your phone's camera, scan the QR code below to download the connection zip file.

5. Open iTAK and go to **Settings → Network → Servers**. Tap the plus icon on the bottom right of the screen and select **Upload Server Package**. Select the zip file named 'IOS-Emergency-Response.zip.'

6. Once you see the green dot next to the server name, you are connected. Use the back button to navigate back to your map.

7. To set your callsign and team, go to **Settings → Callsign/Team Member.**
